

FIXED CORNER OUTSIDE

CBFOT-30°/45°/90°

- Also available in black powder coating.
- Fixed 30° / 45° / 90° external angle configurations
- Reinforced outer-corner frame for high crowd pressure zones
- Engineered for seamless integration with GIANT TRUSS barrier systems
- Optimized load distribution across angled transitions
- Heavy-duty aluminium construction for structural reliability
- Anti-slip working platform for enhanced operator safety

SPECIFICATIONS

Height:	1200mm
Width:	1002mm
Depth:	1160mm
Fixed angle:	45°
Connection	Connection set (Bolts and nuts)
Material:	EN AW 6082T6

Structural Stability at External Transitions

The Giant Truss CBFOT Fixed Corner Outside unit strengthens external turning points where directional crowd force shifts. Its precision-fixed geometry maintains alignment continuity and balanced load transfer across connected barricade sections, delivering dependable performance in high-density concerts, festivals, and large-scale public events.
