SPECIFICATIONS

Height:	1200mm
Width:	193mm
Depth:	1200mm
Connection	Connection set (Bolts and nuts)
Material:	EN AW 6082T6

Clean Termination. Solid Stability.

The Giant Truss CBT1 T-End Barricade provides a stable and secure finishing point for barrier layouts. It reinforces open-ended sections, preventing lateral movement and maintaining alignment integrity across the full crowd control line. Ideal for stage fronts, segmented zones, and controlled entry boundaries in large-scale event environments.
